

# SECURE TRACKING.

## PHARMACEUTICAL LOGISTICS

As a reliable and flexible logistic service provider, **Thermottraffic** has worked for many years with numerous partners in the pharmaceutical industry.

Our services are based on state-of-the-art technology, specially tailored to the requirements of the pharmaceutical industry. Quality and safety are the top priority – we are fully aware of the great responsibility involved in handling highly sensitive medications and pharmaceutical products. We ensure that your products reach your consignees around the world safely and on time.

### OUR SERVICES |

- Temperature-controlled national and international transport
- Temperature-monitored storage in the ranges + 2 °C / + 8 °C , + 15 °C / + 25 °C and – 20 °C
- Handling of hazardous goods

All processes are based on international quality assurance systems, which are audited in accordance with GXP regulations by means of periodic checking of our customers. GPS tracking and detailed reporting ensure transparency and optimum security regardless of national borders.
