

CONTROLLED CONTRACTS.

CONTRACT LOGISTICS

Land or sea transport, customs and veterinary clearance at border controls, in the port or at the external EU borders, it makes no difference: you take care of the selling and we take care of the total logistic process from A - Z throughout Europe, fulfilling all requirements and focusing on costs/benefits.

In contract logistics, **Thermottraffic** handles all aspects of transport and storage logistics – precise, punctual, just-in-time and effective. All the pieces of the logistic puzzle are tailored to your company's specific demands, and we develop your own unique logistic concept.

OUR SERVICES |

- Analysis and subsequent optimization of the goods in Supply Chain Management
- Advising on, designing and realizing customer-specific, individual logistic systems
- Transport of all kinds
- Storage of goods, including all services
- Quality management

As your logistic service and system provider, we organize and control all the necessary steps to ensure that your goods are delivered safely and efficiently from the consignor to the consignee.
